

CHRISTIAN REYES

Data Analyst | Business Analyst | Marketing & Retail Performance Analytics
St. Cloud, FL | 407-577-4671 | chreyes1986@outlook.com | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Data Analyst who pairs 8+ years of frontline retail and sales performance experience at Microsoft and Apple with hands-on SQL, Power BI, and DAX skills — turning real-world business context into dashboards and KPI frameworks that leadership actually acts on.

TECHNICAL SKILLS

SQL & MySQL: Aggregations (GROUP BY/HAVING), inner/outer/self joins, CTEs, window functions, subqueries, UNION/UNION ALL, DATEDIFF and date logic, data validation & cleaning

Power BI & DAX: CALCULATE, DIVIDE, VAR/RETURN, TOPN, FILTER, SELECTEDVALUE, time-intelligence functions (DATESINPERIOD, relative date flags), custom DAX date tables, data modeling & relationships, KPI cards, interactive dashboard design

Excel: PivotTables, INDEX/MATCH, SUMIFS/COUNTIFS, advanced formulas, data cleaning & structuring, cell locking/data validation

Other Tools: Office 365, CRM systems

ANALYTICAL & BUSINESS SKILLS

Marketing Performance Analysis • Customer & Buyer Behavior Analysis • Multi-Location/Event Performance Reporting • KPI Design & Tracking • Trend Identification • Data Storytelling • Actionable Insights

Stakeholder Reporting & Presentations • Cross-Functional Collaboration • Process Improvement • Operational Efficiency • Strategic Decision Support

PROFESSIONAL EXPERIENCE

Independent Data Analyst — Self-Directed Analytics Practice

Jan 2025 – Present

Remote

- Completed the SQL Associate Certification (DataCamp, 2025), building applied skills in SQL, Power BI, and Excel-based analysis.
- Designed and built three end-to-end analytics projects using MySQL and Power BI: a healthcare revenue-cycle dashboard, a SaaS subscription churn analysis, and a hospital billing/claims reconciliation model (see Analytics Projects and Portfolio).
- Maintained continuous, hands-on development in data querying, dashboard design, and exploratory analysis to stay current with analytics tools and practices.

Apple Specialist

Aug 2024 – Jan 2025

Florida Mall, FL

- Assessed customer needs through consultative conversations to identify the most relevant Apple products, services, and ownership options, turning stated and unstated needs into tailored recommendations.
- Maintained current, accurate knowledge of Apple's product lineup, services, and purchase options to support well-informed customer guidance and consistent transaction accuracy.
- Shared product and process knowledge with peers across the sales floor, supporting consistent service quality store-wide.
- Rotated across multiple areas of the store to support operational needs, gaining hands-on exposure to Apple's retail systems and service standards in a short tenure.

Employment Search

Nov 2022 – Aug 2024

Product Advisor/Sales Analyst | Microsoft

Oct 2014 – Nov 2022

Orlando, FL

- Provided consultative, customer-facing sales support — listening to customer needs and recommending Microsoft products and services that genuinely fit their use case.

- Led in-store mini workshops teaching customers Excel and Power BI fundamentals, including formulas, pivot tables, and basic dashboard building.
- Analyzed store and regional management KPIs to identify underperforming areas and surface opportunities for growth.
- Partnered with leadership to help build new Power BI KPI reports, giving management better visibility into store performance.
- Reviewed customer survey data to identify recurring pain points and recommend process improvements across in-store and remote service settings.

ANALYTICS PROJECTS

Browser-Based SQL Practice Tool — SQLite (WebAssembly), HTML/CSS/JS, built with Claude AI (Anthropic)

- Built and deployed an interactive SQL practice platform covering three analyst role tracks (Clinical Operations, Financial Analysis, Marketing Analytics) with 90 practice problems, real-time answer validation, and progress tracking; developed collaboratively with Claude AI to accelerate build and demonstrate applied AI-assisted development. Published live on GitHub Pages and integrated into personal portfolio.

Food Delivery Performance Analysis — Power BI, DAX

- Built a DAX-based date table with fiscal year logic and relative date flags to support time-intelligence reporting on a food delivery dataset; resolved date-hierarchy drill-down issues in visuals to enable accurate period-over-period trend analysis.

Healthcare Financial Analytics Dashboard — MySQL + Power BI

- Built an end-to-end interactive Power BI dashboard analyzing revenue cycle performance across departments and insurance providers, including KPI cards, time-series trends, and conditional formatting for payment delays.

SaaS Subscription Churn EDA — MySQL

- Performed multi-layer exploratory analysis on subscription data across plan types and billing cycles, identifying highest-risk customer segments and translating findings into a concrete promotional recommendation.

Hospital Billing & Insurance Claim Analysis — MySQL

- Joined billing and claims data to surface unreconciled procedures, then proposed an automated reconciliation workflow to reduce missed reimbursements.
