

CHRISTIAN REYES

Data Analyst • Business Analyst • Sales Analyst • Operations Analyst
St. Cloud, FL • 407-577-4671 • chreyes1986@outlook.com • [LinkedIn](#) • [GitHub](#)

PROFESSIONAL SUMMARY

Results-driven analyst with 8+ years of experience turning sales and operational data into actionable business insights. Skilled at identifying performance trends, translating customer behavior into revenue opportunities, and building KPI frameworks that support leadership decision-making. Brings a unique advantage from high-volume retail environments, a proven track record in customer intelligence, stakeholder communication, and cross-functional collaboration, now focused on data and business analysis roles. Proficient in SQL, Power BI, and Excel for reporting, dashboarding, and performance tracking.

SKILLS & COMPETENCIES

Technical: SQL (Database Querying) • Power BI (Dashboards & Visualization) • Excel (Analytics, Pivot Tables, Formulas) • Office 365 • CRM

Analytical: KPI Design & Tracking • Sales Performance Analysis • Trend Identification • Data Validation & Reporting Accuracy • Business Intelligence Workflows

Business: Customer Behavior Analysis • Stakeholder Reporting • Cross-functional Collaboration • Process Improvement • Operational Efficiency

Soft Skills: Problem-Solving • Adaptability • Team Leadership Support • Client Engagement • Attention to Detail

PROFESSIONAL EXPERIENCE

Retail Sales & Data Support Specialist | **Apple** | Florida Mall, FL

August 2024 – January 2025

- Monitored and reported on key retail performance metrics — including product attachment rates, conversion rates, and sales trends — to inform daily operational decisions.
- Analyzed customer purchasing behavior and survey feedback to identify buying patterns and surface upsell and cross-sell opportunities, directly supporting revenue goals.
- Maintained data integrity through POS system validation and contributed to reporting accuracy used in store performance reviews.
- Delivered consultative, needs-based sales in a high-volume environment, leveraging customer insight data to align product recommendations with individual client needs.
- Collaborated with store leadership on daily operations, performance tracking, and customer experience initiatives.

Sales & Performance Analyst | **Microsoft** | Orlando, FL

October 2014 – July 2022

- Analyzed sales data to uncover performance gaps and growth opportunities, contributing to a 10% increase in Microsoft Azure service adoption through targeted, data-backed recommendations.
- Designed and launched a 'virtual store' sales framework during the transition to remote operations, driving a 20% increase in sales within the first quarter — demonstrating the ability to adapt strategy based on behavioral and market data.
- Built, monitored, and refined key performance metrics and KPI reporting frameworks aligned with organizational goals, enabling leadership to make timely, confident decisions.
- Ensured data validation and reporting accuracy across multiple business units, maintaining the integrity of insights delivered to senior stakeholders.
- Partnered with cross-functional teams to develop and implement performance improvement initiatives, translating data findings into actionable operational strategies.
- Conducted ongoing analysis of customer engagement and service adoption trends, using survey results and behavioral data to inform sales strategies and promotional planning.

EDUCATION & PROFESSIONAL DEVELOPMENT

Bachelor of Science, 3D Animation — Atlantic University, Guaynabo, PR

DataCamp Certifications & Coursework

- SQL for Data Analysis — database querying, filtering, aggregation, and joins
- Python for Data Analysis — data manipulation, exploratory analysis with pandas and NumPy
- Power BI — dashboard creation, DAX measures, and business intelligence reporting
- Excel Analytics — advanced formulas, PivotTables, charting, and data modeling

Analytics Projects (Independent)

- Built Power BI dashboards analyzing sales performance, including KPI tracking for revenue trends and conversion rates (GitHub)
- Developed SQL-based datasets and reporting models to simulate real-world business intelligence workflows (GitHub)
